

My Dragonfly Gardens

Visit Report

<date of service>

Client: Delery, Don & Cathy
Lead Gardener: N/A

Property Address: 1682 Jadestone Terrace
Serviced by: Kirsten

General Condition

- The front garden is doing well, there is a large amount of baby Seaside Goldenrod – I suggested removing some of the plants – there are too many to be sustainable.
- Side (back) garden – there are only 2 native perennials left in the wooden bed. The rest were weeds. The other plants in the bed was the Poinciana and a Gloriosa Lily

Weeding Rating

- The rating is 2 ½ - Don will be taking care of the weeds in the back along the stepping-stone pathway.
- Out the front there is not a lot of weeds in the native bed.

Service Provided

- N/A

Good News

- There is baby Beach Verbena coming up in the side bed and also in the wooden framed bed
- The Coral Honeysuckle is looking fantastic and is full of flowers
- The Weeping Yaupon and Red Bud out the front are looking great and doing very well

Concerns

- Only concern for the front is the amount of baby Seaside Goldenrod
- The wooden bed will be very bare once the weeds are removed.
- Special care needs to be take removing the White Mexican Petunia that was already in the bed before – even tiny segments of root will regrow.

Recommendations

- Add more plants in the wooden bed – 2 Rosinflower, 2 Stokes Aster, 3 Narrowleaf Ironweed and 3 Lanceleaf Tickseed should look great and fill the bed with more color over many months
- Adding another Coral Honeysuckle on the trellis next to the other Honeysuckle
- Adding more Beach Verbena in the back area next to the wooden bed.
- Adding 2 Philodendron plants under the tree in the far corner by the screened porch.
- Planting 3 Butterfly Milkweed where the Swamp Milkweed was that did not come back.
- Adding 3 White Tropical Sage in the front garden to add some color and contrast.
